

Stainless steel flammable liquid tank transporter

Product Model	Overall Dimensions (mm)	Curb Weight (kg)	m³	Design Code
HNV9400GRY42	11800*2520*3800	7500/7800/8200	42	L4BH
HNV9400GRY45	12300*2520*3850	7600/7900/8300	44.5	L4BH
HNV9400GRY46	12750*2520*3900	7900/8200/8500	46	L4BH

1. Designed and manufactured in strict accordance with the national standard GB18564.1-2019, fully complying with national standard requirements.
2. Tank vehicle manufacturing follows relevant procedures with strict step-by-step inspections. The cylindrical welds can undergo 100% flaw detection, ensuring reliable tank vehicle quality.
3. The tank vehicle adopts a large-drop variable cross-section design, effectively reducing the center of gravity height for safer driving.
4. All welding of the cylinder adopts automatic welding equipment, resulting in excellent weld formation, minimal cylinder deformation, clean discharging, and superior performance.
5. The tank vehicle exhibits superior performance across all aspects.
